☒ Linux Master Manual (Expert Edition)

1. File System Commands

Command	Description	Usage Example
ls	List directory contents	ls -a1H (Show hidden & links)
cp	Copy files/dirs	cp -rv /src /dest
rm	Remove (Caution!)	rm -rf /path/to/destroy
chmod	Change Mode (Perms)	chmod 755 run.sh

2. User & Password Management

Command	Description	Usage Example
passwd	Change user password	passwd username (Interactive)
chpasswd	Batch update passwords	echo "user:pass" \ chpasswd
useradd	Create new user	useradd -m -s /bin/bash user1

3. Process Management (Zombie Lab)

This section covers process states including Zombies (Defunct).

Zombie Process C Code

```
#include <stdlib.h>
#include <unistd.h>
int main() {
    if (fork() > 0) {
        sleep(10); // Parent ignores child -> Zombie created
    } else {
        exit(0); // Child dies -> Becomes <defunct>
    }
    return 0;
}
```
